

Keyword Analysis and Report

\$30.00

These keywords come with a report explaining the number of searches per month, number of competing sites (the number of search results for the same keywords).

This is the number on reason for having issues with placing where you want on Google. Don't mess around let us handle the keywords for you.

Â

We come up with some **SMART keywords** for you -

Â

Specific - (Pertaining to your site, a good match and in line with on-page optimization)

Measurable - (Keywords you currently do not have a positions for in the search engine results pages, or ones that are not on the first page so we can watch the change)

Attainable - (Are actually possible to land a spot in the results, single words, or very common terms are not going to be easy to get)

Reaching - (Have a reaching impact on your sites visibility and traffic)

Timely - (Will drive relevant related traffic to the pages on your site for a reasonable amount of time)
